Rohini, Delhi

12th

2019

Govt. Higher Secondary School Rajpora

Pulwama, India

📁 Projects

The Tiffin Service Website

- Developed a website for a startup with approximately 450+ subscribers.
- Implemented user registration, login, and profile management.
- Designed a menu and ordering system with secure payment gateway integration.
- Added a calendar feature for scheduling tiffin orders in advance.
- Skills Developed: React.js, Node.js, Express.js, MongoDB

Business Inventory Website

- Created an inventory management system for 4 large businesses using the MERN stack.
- Designed an intuitive and user-friendly dashboard for easy navigation.
- Developed features such as inventory tracking, product management, search, and filtering.
- Created a billing system for generating and managing transaction bills.

HashBin

- HashBin is a web application built on the MERN stack.
- Users can share code samples, logs, links, or markdown notes on the platform.
- The application allows users to enter a custom URL for their shared content.
- Users can set an expiry date for the shared information.
- HashBin provides a convenient way to share and manage various types of content securely.
